

THE SECRETS OF THE MEMORY CHAMPIONS

A NEW WAY TO LEARN TIMES TABLES AND MATHS

EVERYONE has to learn the Times Tables / Multiplication Tables ! The Times Tables are one of the most basic building blocks of **Maths**.

Are your children struggling to learn the times tables?

Are you trying to rote learn them or unable to find a better method?

If the memory champions tried to memorise in the way that our children try to learn the times tables, there would be no amazing memory records. Our brains are not designed to remember in this way.

So what do the memory champions do differently?

They all learn by linking images to locations. This is the basis of all successful memory systems.

THE INSTANT RECALL METHOD

The **Instant Recall Method** uses this principle to learn the **Times Tables** and does this in a very simple, easy, and fun way that achieves 100% Instant Recall.

Why is instant recall so important?

It is the key to confidence. If your child is continually struggling to work out the answers, taking lots of effort and time. This makes it difficult. The key to confidence is to know the answers instantly, without having to think about them.

HOW DOES IT WORK?

Learning times tables the traditional way at school for children is a slow, laborious process as they are learned in a linear way, often using boring rote learning.

If your children can learn the *times tables* in a different way, in a way that is far more attuned to how their brain works, they can achieve astounding results.

When the memory champion, Dominic O'Brien memorized 360, Yes 360 random numbers in only 5 minutes! He did this by linking visual images to locations/set places. The memory champions always maintain that these techniques can be learnt by anyone. This is true because the techniques are so simple and straightforward to learn.

The Instant Recall Method is a memory system specifically designed for children to learn times tables and maths. It really is very easy and simple to use.

Lack of confidence in Maths is a huge problem. Very often, parents pass on their own lack of confidence to their children. This course is designed at every step and in every lesson to give children amazing confidence in Maths.

We all want the best for our children. Well, this is the very best, because our children can **learn the Times Tables** in such a way that they can achieve **Instant**

Recall. They will grow in confidence and with a solid foundation they will excel in maths throughout their school years.

All this is designed to work in the same way your child thinks and learns, giving your children that extra confidence boost in Maths.

Many *Times Tables* and *Maths* products give you style over substance. They have great computer graphics but they are a gimmick because they do not produce the results. This Tutor is a whole system developed over many years, using the best techniques and teaching methods.

HOW DID IT COME ABOUT ?

After studying the best memory techniques during 20 years of teaching and tutoring, Tony Lazar set out to create a system to learn the multiplication tables quickly and easily. Tony has studied and tested the best learning methods in the classroom, and has refined this process into the Instant Recall Method. He then developed the Times Tables Tutor with Mandip Sohal.

You really can boost your children's ability to remember and learn the times tables by joining

The system created has been used to privately tutor many children for several years already. The results over the years have been amazing and children are able to achieve 100% Instant Recall very quickly. Just see the [testimonials and feedback](#) we have received.

If after following this method you truly believe it has not benefited your children within this time, then you can feel secure that you have not lost anything. If you can see the superb results, please drop us a line to let know – That’s all we ask.

Parents and children who have used the method know that it works. We honestly want you to try it – if you don’t, you will never know how well it works for your children.

“We very much look forward to helping you and your children.”

Tony Lazar
